Re: New Well No. 10
Massapequa Water District
NYSDEC # 1-2824-02999/0001
WWA 11647
D&B No. 3359

Dear Mr. Scully:

We are writing with respect to the above referenced application for a new water supply well. A sample collected from the recently installed sentinel well VPB146 indicates the presence of PCE at a concentration of 2.8 ppb at a depth of 100 feet. Additionally, there are increasing trends in other monitoring wells further to the north (VPB126, VPB129, VPB148 and BGOW 3-4). Two monitoring wells south of Hempstead Turnpike exhibit concentrations in excess of 500 ppb. This data clearly indicates that the plume continues to move south towards the Massapequa Water District's (MWD) Northwest Well Field.

As a follow up to our previous correspondence with respect to our pending application, we request that you consider this new data as the required justification for the permit to construct Well 10. Upon receipt of your affirmative response, we are prepared to begin the required work to advance the application.

Sincerely,

Stanley Carey, Superintendent
On behalf of the Board of
Commissioners
