Notice of Construction Work

March 26, 2014

The Massapequa Water District (MWD) will be installing a new water main in your area beginning on or about **April 14, 2014**. The project consists of excavating the roadways and placing the new water main underground. The water main will be installed on the following roads: Ocean Ave between Connecticut Ave and Front Street. This section of water main is being replaced due to the amount of water main breaks over the years and an investigation of the present condition of the water main.

The project is expected to last approximately 6-8 weeks. During construction residents will be inconvenienced for a very short period of time. It will be necessary for the contractor to store the new water main along the route (in front of some of your homes in the roadway) prior to installation. The contractor has informed us that the water main will only be delivered a couple days prior to installation. This will result in only a few days of inconvenience to customers as the project moves along the route. After the water main is installed and certified by the Department of Health, all of the service lines from the new main to the curb area will also be replaced at no cost to customers. The pavement will be restored in a temporary manner with final restoration planned for the fall of 2014. The contractor will be responsible to maintain a safe and smooth road surface during this time.

Please understand this project is part of the Board of Commissioners' commitment to invest and improve the district's infrastructure to help ensure a safe water supply for future generations. If you have any questions or if issues arise during the project please feel free to call me at the above number.

Thank you for your understanding.

Stan Carey, Superintendent
