Notice of Construction Work

July 30, 2021

The Massapequa Water District (MWD) will be replacing the water main in your area beginning on or about **August 2, 2021**. The project consists of excavating the roadways and placing the new water main underground. The water main will be installed on the following roads: Admiral Rd, Anchor Dr, Comet Ln, Dory Ln, and Ensign Ln. The work is being done in conjunction with the Town of Oyster Bay Drainage Project.

Please note the contractor will be saw cutting the road today and continue next week but will not return to do the actual road excavation / water main installation for several weeks.

The water main portion of the project is expected to last several weeks. During construction residents will be inconvenienced for a very short period of time. The water will need to be turned off for a short time on a couple days. The contractor is required to notify you prior to turning the water off with advanced notice. It will be necessary for the contractor to store the new water main along the route (in front of some of your homes in the roadway) prior to installation. After the water main is installed all of the service lines to your homes will be connected to the new main. The contractor will be responsible to maintain a safe and smooth road surface during this time until the Town re-paves the road when the drainage work is complete.

Please understand this project is part of the Board of Commissioners' commitment to invest and improve the district's infrastructure to help ensure a safe water supply for future generations. If you have any questions or if issues arise during the project please feel free to call me at the above number.

Thank you for your understanding.

Stan Carey, Superintendent
